PRICES

All prices are subject to change without notice. Prices do not include taxes of any kind. All quotations automatically expire after 15 days (unless specified otherwise) and are subject to termination by notice within that period.

TERMS OF PAYMENT

Terms are specified by the credit department. No discount on cash payment. Overdue account will be charged a 1½ % monthly interest fee.

APPROVAL

All orders, contracts or agreements are subject to final approval by Etalex which will not be held responsible for late delivery of merchandise directly or indirectly resulting from fire, flooding, war, power shortage, governmental laws and acts, ship lost at sea or other reasons that are not under our control.

CHANGES AND/OR CANCELLATION

All request for changes and/or cancellation are subject to approval by Etalex. All efforts will be made to accomodate these requests. It is possible that fees maybe invoiced.

SHIPMENTS

The choice of carrier must be specified on each order. Etalex will not assume responsibility any transportation costs whatsoever.

All orders are F.O.B. our plant, unless specified otherwise by Etalex.

In most cases, shipments are without back orders, however, in order to best serve our customers, partial shipments may occur (unless customer specifies otherwise).

SHORT SHIPMENT CLAIMS

Please verify the merchandise when it arrives. No short shipment claims will be accepted by the Etalex after five (5) days following its arrival.

DAMAGE CLAIMS

All merchandises are sold on an F.O.B. our plant basis, therefore Etalex will not be held responsible for any damages occured in transit.

All claims must be filled directly with the carrier. Despite exceptional cases in which Etalex may have taken special measures in regards to shipment, the carrier selected through those special measure is not considered an employee nor a representative of Etalex.

Merchandise damage occuring in transit, when delivered by vehicules owned by Etalex, the liability if the company in regards to damages done in transit will be limited to the cost of the merchandise paid by the customer.

RETURNS

Merchandise can not be returned for credit or exchange without our prior approval. When requesting an approval it is necessary to specify **the corresponding invoice or memo number**. Your Sales Representative will evaluate if the request and if the approval is given, a return authorization number will be issued, **it is important that this number be written on all boxes and on the waybill**.

In normal circumstances, 20% restocking fees will be deducted on the credit to cover the handling (reception, inspection and return to inventory) of merchandise returned in pristine condition without damage and in its original packaging.

Restocking fees of **50%** will be deducted for all merchandise returned **without its original packaging** and/or with **light** scuff marks that require repainting and/or slightly damaged but can be fixed.

Merchandise that are painted in **special colors, 50%** restocking fees will be deducted on the credit and that is for all colors with the exception of Polar White, Dust Grey and Sargasse Beige.

No credit will be granted for merchandise **returned damaged or for custom made** items. Unless specified by the customer this merchandise will be destroyed.

LIABILITY OF THE COMPANY

Etalex shall not held be liable whether to purchaser or any third party for damages sustained, directly or indirectly from any purchase of merchandise or equipment, beyond the price paid by the purchaser for such merchandise or equipment.

CUSTOM MADE ITEMS

All custom made merchandise **can not be returned nor cancelled** by the customer under any circumstances.

OWNERSHIP

All merchandise sold by Equipement Boni Inc. remains the property of Etalex until full payment has been received.

IMPORTANT NOTICE

Etalex reserves the right to accept or refuse any order. All transactions are subject to our sales terms. Etalex reserves the right to correct any errors or omissions.

CATALOG

The images and specifications in this catalogue are general and maybe modified by Etalex to improve the product or to optimized manufacturing and this without prior notice.

As much as we have tried to be precise as possible, Etalex will not be held responsible for errors that may have occurred at the time of printing of this catalog.

P = Starter, A= Add-on, 2½ = 30", 3 = 36" and 4 = 48"

FOR REGULAR BONI STRUCTURE (EXCLUDING THE COMPACT SERIES)

MASONITE AND SLATWALL

	Panel 21 5/8	Panel 28 7/8	Total height Masonite Panel	Qty of joiner Wall unit	Qty of joiner Island / 1/2 island	Slatwall Height
34"		1	28 7/8			29 7/8
36"		1	28 7/8			29 7/8
48"	2		43 1/4	1	2	43 3/8
54"	1	1	50 1/2	1	2	50 5/8
60"		2	57 3/4	1	2	57 7/8
66"	3		64 7/8	2	4	65 1/8
72"	3		64 7/8	2	4	65 1/8
78"	2	1	72 1/8	2	4	72 3/8
84"	1	2	79 3/8	2	4	79 5/8
88"						86 7/8
90"		3	86 5/8	2	4	86 7/8
96"	3	1	93 3/4	3	6	94 1/8

Width of the masonite panel

24" = 22 1/2" / 30" = 28 1/2" / 36" = 34 1/2" / 48" = 46 1/2"

Width of the slatwall panel if grooved for Boni uprights

24" = 22 1/2" / 30" = 28 1/2" / 36" = 34 1/2" / 48" = 46 1/2"

Width of the slatwall panel if the uprights have a slatwall channel

24" = 22 5/16" / 30" = 28 5/16" / 36" = 34 5/16" / 48" = 46 5/16"

Width of the slatwall panel for single uprights with slatwall channel

24" = 22 3/8" / 30" = 28 3/8" / 36" = 34 3/8" / 48" = 46 3/8"

FOR ISLAND, HALF-UNIT AND WALL UNIT

STEP 1

Unscrew the levellers by at least 1" to facilitate the levelling of the unit (1 on the post, one on the foot).

STEP 2

Insert the kickplate into the feet.

STEP 3

Insert the bottom tie bar (back base) into the notches at the base of the uprights (for structure with masonite or slatwall backing only).

NOTE

If you are installing a unit with metal panels this step does not concern you.

STEP 4

Insert the galvanized crossbar into the centre notches of the uprights (approximately 6" from the top). Fold back the tabs to stiffen the unit (see arrow for details). For structure with masonite or slatwall backing only.

NOTE

If you are installing a unit with metal panels this step does not concern you.

FOR ISLAND, HALF-UNIT AND WALL UNIT

STEP 5 (FOR WALL UNIT ONLY)

When installing a wall unit of 72" or higher, the use of an anchor bar is **strongly** recommended. This bar must be placed between the uprights and fastened with screws to the wall **wood** studs. One bar per section.

WARNING

If heavy items such as paint, hardware or plumbing parts are to be put on the shelves, you must install on each section a heavy duty anchor bar that will be fastened to the uprights with metal screws and fastened to the wall wood studs.

STEP 6

Slide the backing(s) between the uprights. A joiner is supplied when needed to join 2 panels or more.

NOTE

If you are installing a unit with metal panels this step does not concern you.

STEP 7

Place the top cap as shown.

FOR ISLAND, HALF-UNIT AND WALL UNIT

STEP 8

Levelling

To level half-units or wall units, level lengthwise the unit with the **B** levellers, then drop the **A** levellers so that they touch the floor and then verify the overall level. **For a wall unit, make sure that the unit tilts slightly toward the back.**

To level an island, start with the **B** levels to level vertically, then level horizontally with the levellers **A** and **C**.

STEP 9

Drop the base shelf into place, between the two halves of the feet.

STEP 10

Slide the shoe cover into place between the two halves of the feet.

STEP 11

Place the finishing cap as shown (if required).

INFORMATION REGARDING METAL BACKING

The metal backing (plain or perforated) slides inbetween the uprights like the masonite backing. The end that resembles an arrow head goes head down like the small drawing on the right.

There is a stopper at the base of the upright that will stop the backing once it is at its lowest possible position.

INSTALLATION PROCEDURES B-05

FOR ISLAND, HALF-UNIT AND WALL UNIT

STEP 1

Unscrew the levellers by at least 1" to facilitate the levelling of the unit (1 on the post, one on the foot).

STEP 2

Insert the kickplate into the feet.

STEP 3

Insert the bottom tie bar (back base) into the notches at the base of the uprights (for structure with masonite or slatwall backing only).

NOTE

If you are installing a unit with metal panels this step does not concern you.

STEP 4

Insert the galvanized crossbar into the center notches of the uprights (approximately 6" from the top). Fold back the tabs to stiffen the unit (see arrow for details). For structure with masonite or slatwall backing only.

NOTE

If you are installing a unit with metal panels this step does not concern you.

INSTALLATION PROCEDURES B-06

FOR ISLAND, HALF-UNIT AND WALL UNIT

STEP 5 (FOR WALL UNIT ONLY)

When installing a wall unit of 72" or higher, the use of an anchor bar is **strongly** recommended. This bar must be placed between the uprights and fastened with screws to the wall with **wooden studs**. One bar per section.

WARNING

If heavy items such as paint, hardware or plumbing parts are to be put on the shelves, you must install on each section a heavy duty anchor bar that will be fastened to the uprights with metal screws and fastened to the wall with wooden studs.

STEP 6

Slide the backing(s) between the uprights. A joiner is supplied when needed to join 2 panels or more.

NOTE

If you are installing a unit with metal panels this step does not concern you.

STEP 7

Place the top cap as shown.

FOR ISLAND, HALF-UNIT AND WALL UNIT

STEP 8

Levelling

To level half-units or wall units, level the unit lengthwise with the **B** levellers, then drop the **A** levellers so that they touch the floor and then verify the overall level. **For a wall unit, make sure that the unit tilts slightly toward the back.**

To level an island, start with the **B** levels to level vertically, then level horizontally with the levellers **A** and **C**.

STEP 9

Drop the base shelf into place, between the two halves of the feet.

STEP 10

Slide the shoe cover into place between the two halves of the feet.

STEP 11

Place the finishing cap as shown (if required).

INFORMATION REGARDING METAL BACKING

The metal backing (plain or perforated) slides in-between the uprights like the masonite backing. The end that resembles an arrow head goes head down like the small drawing on the right.

There is a stopper at the base of the upright that will stop the backing once it is at its lowest possible position.

ENDFRAME AND END BASE SHELF

STEP 1 Install the levellers upward into the side kickplates as shown.

STEP 2 Slide the side kickplates into the front kickplate.

STEP 3 Slide the entire assembly into the island's feet.

STEP 4 Drop the base shelf onto the levellers.

STEP 5 Insert the attachment of the endframe (A) into the upright. The bottom attachment will slide between the 2 base shelves. Screw the endframe to the upright to secure it.

ENDFRAME AND ENDFRAME KICKPLATE

- STEP 1** Fold the kickplate tabs upward. (fig. A).
- STEP 2** Slide the kickplate into the feet of the island.
- STEP 3** Slide the endframe into place, the upper attachment (fig. B) goes into the upright and the 2 bottom angles (fig. C) goes between the halves of the feet.
- STEP 4** Screw the endframe to the upright to secure it.

ENDFRAME WITH KICKPLATE (WHEN THE FRAME IS NARROWER)

STEP 1 Place the kickplate (A) against the feet of the island, insert the shoe covers into place to lock in the kickplate.

STEP 2 Slide the endframe into place, the upper attachment (fig. C) into the upright, the lower attachments go between the two halves of the feet.

STEP 3 Screw the endframe to the upright to secure it.

CASH COUNTER - CONVENIENCE STORE TYPE

Step 1 Assemble the base structure like an island.
See pages B-5 to 7.

Step 2 Place the end panel against the end upright.
The top of the panel must be flush with the top of the upright. Adjust the height of the panel with the levellers under it.

Insert the lower attachments (1) into the 2 halves of the feet and secure it to the panel with screws.

Screw into place the upper attachments to the panel.

Place the counter top on top of the island, (it will exceed the end panels by about ½")
Secure the top to the side panels with screws through the upper attachments (2).
Finally, insert the counter top brackets (3) into place. **Important**: Contrary to regular brackets, these must be pushed upward into place and have to be secure to the counter top with screws.

Step 3 If the counter top is in 2 parts, join the parts together with the special attachment.

Step 4 Install the shelves, the straight ones go on the clerk's side, the adjustable ones on the client's side. Secure the shelves to the brackets by pushing in the metal half-moon into the bracket's hole. The half-moon must be install on the back. If the counter is supplied with shelves with label moulding. they must be bolted to the brackets.

Without moulding (rear)

With label moulding (front)

Étape 1 Insert the uprights into the base.

Étape 2 Slide one backing into place.

Étape 3 Place a plastic joiner on top of the backing.

Étape 4 Slide the second backing into place.

Étape 5 If required, slide the finishing cap onto the base.

Étape 6 Drop the top into place.

Take note that the base and top are identical

FOR LABORATORY UNIT

7 L-shaped adaptor for lab unit (for corner).

8 Clip for double unit.

9 Clip for end unit.

10 Crossbar for lab unit.

11 Shelf for lab unit (reversible).

12 Wall anchor for lab unit.

13 End to end clip for lab unit.

14 Finishing corner for lab unit.

WIRE MESH WING

- Step 1** Insert the SBP-00-0403 attachments into the upright with the rod towards the bottom (A)
- Step 2** Place the wire mesh wing against the attachments, screw the W clip to the attachments with the thumb screws.
- Step 3** Place hooks or baskets as per your needs (sold separately)

ROTATING HOOK DISPLAY

Step 1 Slide elbows into the crossbars. The drawings illustrate the set-up for a left side installation. For a right side installation, flip the elbows as shown by the letter A and also invert the leveller.

Step 2 Slide the 2 ends into the crossbars.

Step 3 Insert the crossbar (with levers) into the uprights as close as possible to the shelf, adjust the leveller so that it touches the shelf and make sure that the elbow is levelled.

Step 4 To install the upper crossbar, you may have to lift the shelf. The correct distance between the upper and lower crossbar is 59 3/4".

Note that in order to install the display as illustrated, the use of 2 extension arms is required (*).

ROTATING HOOK DISPLAY

Step 5

On the bottom elbow pin, place a washer, a bearing and another washer as shown. Insert the elbow into the bottom attachment. The front of the elbow must be 5" away from the front of the shelf (if required).

Step 6

Place the bottom and the upper part in the same position.

Step 7

Insert the triangular display onto the bottom pin (the sign holder must be at the top). Insert the upper elbow into the upper hole. Slide the upper elbow into the elbow of the crossbar. Make sure the triangular display is levelled.

Step 8

Slide the sign (not supplied) on the three faces of the triangle as shown. Afterwards install your hooks.

METAL CABINET WITH SLIDING GLASS DOORS

Step 1 Insert the base into the side panels. Press firmly down to the bottom.

Step 2 Slide in the top from the back to the front.

Front

Step 3 Install the frame into the uprights.

METAL CABINET WITH SLIDING GLASS DOORS

Upper rail
with 2-way tape

U-shaped
plastic slider

Glass door

U-shaped
rubber moulding

H-shaped rail
with wheels

Lower rail
with 2-way tape

Step 4

Secure the upper rail into place, place the u-shaped plastic slider on the glass door, insert the door into the rubber moulding, insert them into the H-shaped moulding.

Secure the bottom rail into place.

Step 5

Install doors as shown.

Step 6

If you purchased a TDK-7 sliding type lock, the slide must be secured to the back door.

Step 7

Finally, glue door handles into place.

17' LONG SPOOL DISPLAY FOR WAREHOUSE RACKING (2 BAYS OF 102")

- Step 1** Insert tube no. 1 onto the rear beam, secure it into place with a nut & bolt.
- Step 2** Insert tube no. 3 into tube no. 1, the support angle will rest onto the front beam which is installed lower than the rear one.
- Step 3** Once the support angle is resting in its correct position, lock it into place with the thumb-screw no. 2.
- Step 4** Place the no. 4 holders at the appropriate position, lock them into place with a nut & bolt.
- Step 5** Insert the tube into the spool(s) and place it into the holders. The tubes supplied are 60" in length, but you can cut them to size on site.

STORAGE UNIT

Step 1 Place the inside shelves (not supplied) at the correct height. Place the storage unit brackets at the correct height.

Step 2 Place the front frame in place by inserting the pins into the first series of holes on the shelf. If the frame seems slanted, it maybe because your base shelf is install the opposite way. Turning it from front to back will solve the problem.

Step 3 Insert the side panels into place.

Step 4 Drop shelf into place as illustrated.

SLIDING PERFORATED PANEL

- Step 1** Position the U-rail (no. 1) onto the structure at the desired height.
- Step 2** Insert the perforated panel (no. 2) into the rail (no. 3).
- Step 3** Drop rail into position (no. 3) inside the u-rail (no. 1). The U-rail will support the perforated panel and his rail.
- Step 4** Position the rail at the required depth. According to the hooks you will use at the back, fasten the rail to the U-rail using 4 self-taping screws (no. 4).
- Step 5** Attach the brackets (no. 5) to the rub-rail (no. 6) with nuts & bolts, insert the assembly into the structure so that the rub-rail will be at least 2" higher than the bottom of the sliding panel, tighten the nuts & bolts once rail is at the correct depth.

VERTICAL SPOOL DISPLAY

Step 1 Insert the upright (no. 2) into the upper attachment (no. 1). Place them between the 2 beams (shown in red), push the upper attachment upward and then fasten it to the upright using self-taping screws, repeat for all the uprights.

Uprights are specified as left, centre and right. Spac them approximatly 18".

Step 2 Insert the rod holders (no. 4) into the pilaster strip on the side of the uprights. One set close to the top and one near the bottom. (This will help you space each uprights correctly). Space each upright according to the length of the rods for each opening (no. 5).

Step 3 Once all the uprights have been positioned at their correct place, secure them using self-taping screws into the top and bottom holes of the upright attachments (no. 6)

FOUR WAY MERCHANDISER

Step 1 Trace the outline of the top cap onto the base to facilitate the assembly.

Step 2 Place the two panels that have an angle on the inside face to face, fasten them at the proper place with metal screws.

10" x 24" shelf max.

10" x 30" shelf max.

16" x 30" shelf max.

10" x 36" shelf max.

Step 3 Take the two other panels and place them against the others, fasten them at the bottom with metal screws.

Step 4 Place the top cap onto the panels and secure it with metal screws in every hole.

FOUR WAY MERCHANDISER

Step 1 Trace the outline of the top cap onto the base to facilitate the assembly.

Step 2 Place the two panels that have an angle on the inside face to face, fasten them at the proper place with metal screws.

10" x 24" shelf max.

10" x 30" shelf max.

16" x 30" shelf max.

10" x 36" shelf max.

Step 3 Take the two other panels and place them against the others, fasten them at the bottom with metal screws.

Step 4 Place the top cap onto the panels and secure it with metal screws in every hole.

SANDPAPER DISPLAY

Step 1 Attach side panels (left and right) to each shelf using metal screws.

Step 2 Insert the paper-weight plates on the first level.

LIGHT FIXTURE SUSPENDED DISPLAY

NOTE THAT THE MAXIMUM CAPACITY IS 50 LBS PER SQUARE FOOT

DO NOT WALK ON THIS DISPLAY !

The configuration will vary according to specifications given.

Attachments
Turnbuckles
Chains
Hardware
Beams for roof trusses (C-shaped)

LIGHT FIXTURE SUSPENDED DISPLAY

1 Insert the C-channels in-between the roof trusses as shown (no. 1).

2 To avoid slippage, it is **mandatory** to secure the beams using the attachments with a steel rod that must be inserted in-between the 2 halves of the roof trusses and bolted into place.

3 Turnbuckles assist in leveling the display.

4 C-channel attachments for turnbuckles.

5 Suspension attachments with a quick link welded to it.

6 If the chain can not be attached to the C-channel as illustrated (fig.3 and 4), proceed as illustrated in figure 6 and attach the chain around itself using a strong quick-link or a bolt, washer and lock-nut.

LIGHT FIXTURES DISPLAY SET ON TOP OF ISLAND OR WALL UNIT

This display is set on top of the uprights of the islands and/or wall unit and/or partially suspended according to the specifications of the client.

Note that the drawings on page B-24 can vary according to the specifications.

LIGHT FIXTURES DISPLAY SET ON POSTS ANCHORED TO THE FLOOR

This display is set on posts that are anchored to the floor and/or partially suspended according to the specifications of the client.

Note that the drawings on page B-24 can vary according to the specifications.

CARPET DISPLAY

IMPORTANT NOTICE

The frames must be reinforced, meaning with more crossbracing.

*Anchoring to the floor is **mandatory**. Use 3/8" x 3 3/4" long concrete anchors.*

- Step 1** Place the upper and lower beams at the desired height (No. 1 & No. 2).
- Step 2** Install the crossbracing attachments as shown (No. 3). After, tighten the turn-buckle.
- Step 3** Insert the carpet page in between the beams (No. 4).

CARPET DISPLAY

- Step 4** *Install the retaining tube to the upper beam.
This tube will prevent the page from popping
out accidentally
(No. 5).*

PROMOTIONAL SIDE PANEL (WING)

Step 1

This regards only the panels that do not have the upper attachment welded-on.

Place the panel against the upright on the side you want to panel to be.

Insert the upper attachment into the upright and push it outward, fasten it in place with the two Tek screws supplied

Step 2

Insert the Z-shaped attachment into the space between the two halves of the foot, fasten it in place using the two self-taping screws supplied.

FAÇIA / CANOPÉ

ÉTAPE 1

Fixer les extensions de façade aux supports d'extension (ils ressemblent à des supports normaux sauf qu'ils ont plus de trous pour fixer les extensions) à l'intérieur des supports tel qu'illustré ci-bas à l'aide de petits boulons et écrous fournis.

Support d'extension de façade

Extension de façade

Il y a des cotés **Gauche** et **Droit** pour les extensions de façade.

ÉTAPE 2

Insérer une paire d'ensemble support/extension de façade par section de murale, îlot ou bout d'îlot.

FAÇIA / CANOPÉ

ÉTAPE 3 (Optionel)

Fixer sur les extensions la planche de mélamine blanche de 2" x 47¾" (pour section de 48") à l'aide de vis à bois (non-incluses) par le dessous. Cette planche servira à fixer les fixtures à DEL dans une étape futur.

ÉTAPE 4

Fixer le façade au devant des extensions de façade à l'aide de vis à bois (non-incluses), visser par l'arrière. Noter que les façias aux extrémités et/ou section seule sont plus long que ceux du centre.

À chaque joint entre deux façias, les joindre avec une plaque de menuiserie et vis à bois (non-inclus) pour que le joint soit serré et que les façias soit égaux.

ÉTAPE 3 (Optionel)

ÉTAPE 4

FAÇIA / CANOPÉ

Structure (îlot, bout d'îlot ou murale)

ÉTAPE 5 (Optionel)

Fixer les bouts de finition aux supports d'extension à l'aide de vis à bois (non-incluses) et au façade avec des angles en L de menuiserie (non-inclus).

ÉTAPE 6 (Si Requis)

Fixer les angle d'aluminium blanc (en rouge) au dos des façade et à la structure à l'aide de vis à bois et/ou métal (non-inclus).

Note:

Si des fixtures avec tube fluorescent (néon) sont utilisés, viser ceux-ci directement aux extensions de façade.

ÉTAPE 7 (Si Requis)

Fixer les fixtures à DEL (en bleu) aux planches de mélamine avec les vis et attaches fournies, centrer chaque fixture au centre de chaque planche, puis si requis brancher un câble inter-connexion de fixture en fixture. À la fin brancher le câble d'alimentation à une prise de courant 110V.

ÉTAPE 8 (Si Requis)

Déposer le carrelage en plastique blanc (en gris) sur les angles d'aluminium. Il est possible que vous ayez à couper en longueur et profondeur les carrelages pour remplir la zone à couvrir.

FAÇIA / CANOPÉ - LONGUEUR DES FAÇIA SELON LEUR POSITION

Section de 24" Bout : $24\frac{3}{4}"$, Centre : 24"

COMPACT SERIES ISLAND

STEP 1

Insert the bottom tie bar into the slots at the base of each uprights.

STEP 2

Slide in the chosen backing (slatwall, plain metal panel, masonite) into the uprights chanel.

Take note that for the masonite panels a spacer must be installed with 2-way tape and fixed to the upright's channel.

STEP 3

Place the top cap in place making sure that it will insert into the first slots of the uprights (A) and that the metal tab is in into the uprights.

Afterward place the end caps at the extremities of the end uprights (B).

STEP 4

Drop into place the base shelves onto the uprights base into the slot at the top.

STEP 5

Level all accordingly using the levellers.

COMPACT SERIES HALF-ISLAND AND/OR WALL UNIT

STEP 1

Insert the bottom tie bar into the slots at the base of each uprights.

STEP 2

Slide in the chosen backing (slatwall, plain metal panel, masonite) into the uprights chanel.

Take note that for all types of backing spacers are required and must be installed with 2-way tape to the upright's chanel.

STEP 3

Place the top cap in place making sure that it will insert into the first slots of the uprights (A) and that the metal tab is in into the uprights.

Afterward place the end caps at the extremities of the end uprights (B).

STEP 4

Drop into place the base shelf onto the uprights base into the slot at the top.

STEP 5

Level all accordingly using the levellers.

PRODUCT INDEX

<i>Attachment for promotional wire mesh side panel</i>	D-16
<i>End display (Half Island)</i>	D-0 to D-10
<i>Endframe</i>	D-11
<i>Endframe kickplate</i>	D-11, 12

<i>Lighting display or valance bracket</i>	I-29
<i>Magasin rack for pegboard or slatwall</i>	I-18
<i>Magnet roll</i>	I-10
<i>Metal shelf wire mesh divider, sub-divider and fence</i>	I-12
<i>Mica roll</i>	I-09
<i>Neon tube</i>	I-30
<i>Newspaper shelf</i>	I-18
<i>Plastic hand basket and stand</i>	I-26
<i>Plastic tab (card repair)</i>	I-09
<i>Profit clip</i>	I-19
<i>Promotional basket 33" high with sign holder</i>	I-17
<i>Road map display</i>	I-18
<i>Shelf label extrusion</i>	I-09
<i>Shelf with label moulding</i>	I-05
<i>Shelf with label moulding and adjustable brackets</i>	I-03
<i>Shelf with label moulding and straight brackets</i>	I-01
<i>Shelf without label moulding</i>	I-06

PRODUCT INDEX

<i>Shelf without label moulding and adjustable brackets</i>	I-04
<i>Shelf without label moulding and straight brackets</i>	I-02
<i>Sign holder</i>	I-27
<i>Single hook for masonite or metal pegboard</i>	I-20
<i>Single hook for slatwall - chrome finish</i>	I-21
<i>Single scan hook for ½" x 1½" crossbar</i>	I-24
<i>Single scan hook for masonite pegboard</i>	I-22
<i>Single scan hook for metal pegboard</i>	I-23
<i>Single scan hook for slatwall - painted black</i>	I-22
<i>Single scan hook for slatwall - zinc finish</i>	I-21
<i>Slatwall accessory back plate</i>	I-25
<i>Slatwall tire display</i>	I-25
<i>Small endless wire basket and divider for masonite pegboard</i>	I-17
<i>Support frame for glass shelf</i>	I-31
<i>Two way tape</i>	I-10
<i>Two-piece single hook for masonite and metal pegboard</i>	I-21
<i>Two-piece single scan hook for masonite and metal pegboard</i>	I-23
<i>Universal adaptor</i>	I-36
<i>Universal attachment pour profit clip</i>	I-19
<i>Versa-Flex shelf</i>	I-34
<i>Wire basket and wire shelf bracket</i>	I-13
<i>Wire basket identification moulding / Clear plastic</i>	I-10
<i>Wire basket label extrusion</i>	I-10
<i>Wire mesh littérature holder (1 piece)</i>	I-19
<i>Wire mesh shelf for slatwall</i>	I-16, 17
<i>Wire mesh shelf with 1" high front lip and welded brackets</i>	I-15
<i>Wire mesh shelf with 2½" high front and back lip</i>	I-12
<i>Wire mesh shelf with 3" high front lip and welded brackets</i>	I-14
<i>Wire mesh shelf with 3" high front lip, moulding and welded brackets</i>	I-14
<i>Wire mesh shelf with moulding for acrylic fence and welded brackets</i>	I-15
<i>Wire mesh shelf with steel bottom</i>	I-18

#13
SQUARE

All Nova showcases are available in the above profiles in natural anodized finish. As an option, they can be painted. Matching plastic corners are available in black, white or grey.

The kickplate is 3 3/8" high with levelers. The melamine panels are available in black, grey and almond and are 1/2" thick.

The mirror doors slide on plastic tracks, with grey backs on all showcases except for NOV-350, 450 and 900. The lock supplied is a sliding type.

The glass panels are inserted into a plastic strip located in the profile. The melamine panels are inserted directly into the profile.

Storage section sliding doors on the Nova profiles are 1/2" thick melamine, with recessed chrome finished handles.
